LABEL MATERIALS CATALOG

Custom and Blank
Label Materials

We specialize in freezer label stock and adhesives for cold temperature applications. The most common freezer label applications are in the food sector and cryogenic, lab settings. Labels for such conditions need to be durable, moisture proof, flexible, and they need to have an ultra strong, deep freeze adhesive that adheres to products in the coldest temperatures.

From time to time we receive specific requests that require careful consideration of all factors that will determine the type of label stock and adhesive. Examples are champagne bottles immersed in ice buckets, already frozen food products in unusual packaging, etc. In order to manufacture labels that will adhere to the packaging at all times and throughout the product's shelf life, we need to know everything about the product: from its size, shape and material, to shipping, handling and storing conditions. Detailed information from customers and years of experience help us manufacture labels that endure.

In addition to freezer label materials, we provide a full range of label stock and adhesives for any type of custom or blank label. Read through our catalogue for specifications of the most common types of labels, and get acquainted with our offer before contacting us with your order.

- 06.** Paper Labels on Rolls with UV Varnish
- 07.** Semi-gloss Paper

POLYESTER

- 08.** Gold Polyester
- 09.** Silver Polyester

POLYPROPYLENE AND POLYETHYLENE

- 10.** Clear Polypropylene
- 11.** White Polyethylene
- 12.** White Polypropylene

VINYL

- 13.** Clear PVC
- 14.** White Gloss and Matte PVC

PAPER

HIGH GLOSS WHITE DEEP FREEZE PAPER

Deep freeze paper is a self-adhesive paper for offset printing on sheets. It is commonly used for address and shipping labels, promotional labels, all types of packaging labels, pricing, inventory, children's labels, etc. It can be used on rough or curved surfaces.

01

MATERIAL SPECIFICATIONS:

- PREMIUM QUALITY WHITE WOODFREE PAPER
- STRONG ADHESIVE WITH EXCELLENT INITIAL TACK AND HIGH HOLDING POWER
- BEFORE APPLYING THE LABEL, THE SURFACE MUST BE CLEAN AND DRY
- LABELS CAN EASILY BE REMOVED AT ROOM TEMPERATURE
- SHELF LIFE: 2 YEARS AT 20°C

GLOSSY PAPER

Glossy paper accentuates colors and printed information on the label, giving products a premium look. They are commonly used for promotional purposes, and they look particularly good on bottles and jars.

02

MATERIAL SPECIFICATIONS:

- GLOSS WHITE COATED WOODFREE PAPER USED WITH ACRYLIC PERMANENT ADHESIVE
- GOOD ADHESION TO A WIDE VARIETY OF MATERIALS
- SHELF LIFE:
36 MONTHS
AT 22°C ± 2°C

LAMINATED HIGH GLOSS PAPER

This is the Ritrama glossy paper laminated with high gloss for added durability and protection. It is commonly used for promotional and general applications.

03

MATERIAL SPECIFICATIONS:

- GLOSS WHITE COATED WOODFREE PAPER, LAMINATED FOR EXTRA DURABILITY
- ACRYLIC PERMANENT ADHESIVE
- GOOD ADHESION TO A WIDE VARIETY OF MATERIALS
- SHELF LIFE: 36 MONTHS AT 22°C ± 2°C

MATTE PAPER

White non-shiny woodfree paper with acrylic permanent adhesive is a good choice for labels where readability of information is important. They are commonly used for menus, manuals, all sorts of food packaging, etc.

04

MATERIAL SPECIFICATIONS:

- WHITE WOODFREE PAPER WITH PERMANENT ACRYLIC ADHESIVE
- STRONG ADHESION TO A WIDE RANGE OF SURFACES
- SHELF LIFE: 36 MONTHS

PAPER + FOIL STAMPING

Glossy, semi-gloss or matte paper can be used in combination with gold or silver foil stamping. This is the process of applying a metallic (gold or silver) foil to the surface of the label, making it eye-catching and elegant. It is commonly used for patterns and lettering on premium food packaging, business cards, wedding invitations, etc.

05

MATERIAL SPECIFICATIONS:

- ACRYLIC PERMANENT ADHESIVE
- GOOD ADHESION TO A WIDE VARIETY OF MATERIALS
- SHELF LIFE: 36 MONTHS AT 22°C ± 2°C

PAPER LABELS ON ROLLS WITH UV VARNISH

Not all label stock and adhesives are appropriate for labels on rolls. Our Primecoat paper is a white woodfree paper with semi-gloss appearance. It is commonly used for promotional and industrial label applications, cosmetic, pharmaceutical and food product labels.

06

MATERIAL SPECIFICATIONS:

- GENERAL PURPOSE RUBBER-BASED ADHESIVE
- HIGH TACK ADHESIVE FOR A WIDE RANGE OF SURFACES
- SHELF LIFE: TWO YEARS, STORED AT 22°C

SEMI-GLOSS PAPER

Medium-gloss white coated woodfree paper with a permanent acrylic adhesive is suitable for food products, especially seafood, poultry and meat product packaging. It is often used for barcodes as well.

07

MATERIAL SPECIFICATIONS:

- MEDIUM GLOSS WHITE COATED PAPER
- ACRYLIC PERMANENT ADHESIVE SUITABLE FOR A WIDE VARIETY OF MATERIALS
- SHELF LIFE: 36 MONTHS

POLYESTER

GOLD POLYESTER

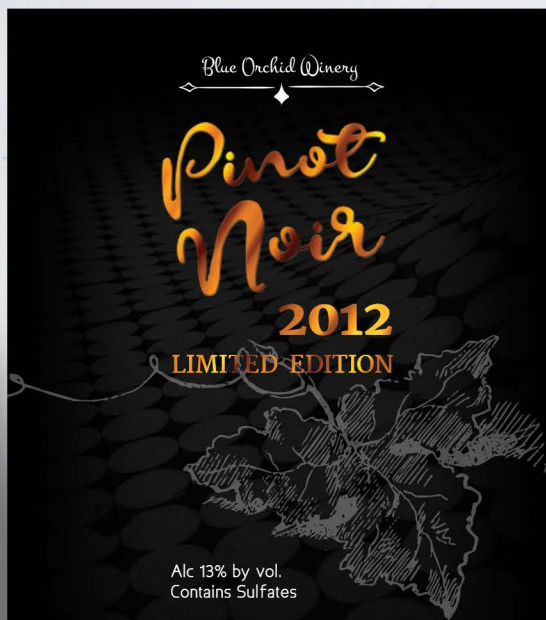

Gold polyester film with long-term ageing properties. For use as premium quality decorative labels, name and technical plates, decoration and mouldings, safety stickers, etc. Suited for temperatures up to +8° C.

08

MATERIAL SPECIFICATIONS:

- EXCELLENT DIMENSIONAL STABILITY
- HIGH SEA WATER RESISTANCE
- TEMPERATURE RESISTANCE
- CLEANING SOLVENTS RESISTANCE
- SHELF LIFE: 2 YEARS

SILVER POLYESTER

Silver polyester film with long-term ageing properties. For use as premium quality decorative labels, name and technical plates, decoration and mouldings, safety stickers, etc. Suited for temperatures up to +8° C.

09

MATERIAL SPECIFICATIONS:

- EXCELLENT DIMENSIONAL STABILITY
- HIGH SEA WATER RESISTANCE
- TEMPERATURE RESISTANCE
- CLEANING SOLVENTS RESISTANCE
- SHELF LIFE: 2 YEARS

POLYPROPYLENE AND POLYETHYLENE

CLEAR POLYPROPYLENE

This is a durable, high quality synthetic material with a permanent adhesive used on a wide range of surfaces. Resistant to tearing, heat, chemicals, etc. It's commonly used for applications that need a "no label" look.

10

MATERIAL SPECIFICATIONS:

- EXCELLENT DIMENSIONAL STABILITY
- HIGH SEA WATER RESISTANCE
- TEMPERATURE RESISTANCE
- CLEANING SOLVENTS RESISTANCE
- SHELF LIFE: 2 YEARS

WHITE POLYETHYLENE

This white polyethylene film is specifically designed for chilled processed foods, such as freshly packed meat, sliced sausages and cheese. It enhances premium food brand image.

11

MATERIAL SPECIFICATIONS:

- WHITE POLYETHYLENE FILM WITH MEDIUM GLOSS APPEARANCE
- ALL TEMP PERMANENT ACRYLIC ADHESIVE WITH HIGH INITIAL TACK
- EXCELLENT LOW TEMPERATURE PERFORMANCE ON A WIDE VARIETY OF SURFACES
- LIGHTER, LESS WASTE, REDUCES THE ENVIRONMENTAL IMPACT
- LIMITED PERFORMANCE ON CURVED SURFACES
- SHELF LIFE: 2 YEARS AT 22°C

WHITE POLYPROPYLENE

This is a very durable material, mostly used for application on rigid containers (such as glass, PET) because of the rigid nature of the polypropylene film. Not ideal for use on non-uniform surfaces and applications where a high level of squeezability is required, but it is more tear-resistant than polyethylene.

12

MATERIAL SPECIFICATIONS:

- WHITE POLYPROPYLENE FILM WITH A PRINT-RECEPTIVE TOP-COAT
- GENERAL PURPOSE PERMANENT ACRYLIC ADHESIVE
- EXCELLENT UV RESISTANCE
- SHELF LIFE: 2 YEARS

VINYL (PVC)

CLEAR PVC

Gloss clear polymeric material with permanent acrylic adhesive is ideal for outdoor applications, mostly on flat, or gently curved or corrugated surfaces. It is resistant to most mild acids, alkalis and salts.

13

MATERIAL SPECIFICATIONS:

- EXCELLENT PRINTABILITY ON INKJET PRINTERS
- EXCELLENT CLARITY
- EXCELLENT DIMENSIONAL STABILITY
- GREAT OUTDOOR DURABILITY AND PERFORMANCE
- EXCELLENT ADHESION TO MOST SUBSTRATES
- HIGH GLOSS FINISH FOR SUPERIOR APPEARANCE
- OUTDOOR LIFE: UP TO 7 YEARS
- SHELF LIFE: 2 YEARS

WHITE GLOSS AND MATTE PVC

Soft PVC film available with a glossy or matt surface. It is best used for brilliant and colorful advertising for short- and medium-term outdoor use.

14

MATERIAL SPECIFICATIONS:

- PVC FILM WITH PERMANENT TRANSPARENT ADHESIVE
- MINIMUM APPLICATION TEMPERATURE: 10°C
- HIGH DIMENSION STABILITY
- HIGH WATER AND TEMPERATURE RESISTANCE
- SHELF LIFE: 2 YEARS
